

traceproto.h

```
graph BT; tp_miscfunc_c[tp_miscfunc.c] --> traceproto_h[traceproto.h]; tp_output_c[tp_output.c] --> traceproto_h; tp_packet_c[tp_packet.c] --> traceproto_h; traceproto_c[traceproto.c] --> traceproto_h;
```

A diagram illustrating the relationship between four C source files and a common header file. At the top is a gray box labeled 'traceproto.h'. Below it are four white boxes: 'tp_miscfunc.c', 'tp_output.c', 'tp_packet.c', and 'traceproto.c'. Four blue arrows point from each of these source files up to the 'traceproto.h' header file, indicating that all four source files include this header.
