

# Package ‘SQN’

January 20, 2025

**Type** Package

**Title** Subset Quantile Normalization

**Version** 1.0.6

**Date** 2022-06-10

**Author** Zhijin(Jean) Wu, Martin Aryee

**Maintainer** Martin Aryee <martin.aryee@gmail.com>

**Depends** R (>= 2.6.0), mclust(>= 3.2), nor1mix(>= 1.0-7)

**Description** Normalization based a subset of negative control probes as described in 'Subset quantile normalization using negative control features'. Wu Z, Aryee MJ, J Comput Biol. 2010 Oct;17(10):1385-95 [PMID 20976876].

**License** LGPL (>= 2.0)

**NeedsCompilation** no

**Repository** CRAN

**Date/Publication** 2022-06-10 16:00:02 UTC

SQN	<i>subset quantile normalization</i>
-----	--------------------------------------

---

## Description

This function performs normalization based on a subset of negative controls whose distribution is expected to be unchanged in various samples. There is no restriction on the behavior of the rest of the measurements.

**Usage**

```
SQN(y, N.mix = 5, ctrl.id, model.weight = 0.9)
```

**Arguments**

```
y           A matrix of unnormalized data.
N.mix       Number of normal distributions in the mixture approximation.
ctrl.id     index of controls. Must be a vector smaller than nrow(y)
model.weight weight given to the parametric normal mixture model
```

**Value**

A matrix of normalized data

**Author(s)**

Zhijin Wu

Wu Z and Aryee M. Subset Quantile Normalization using Negative Control Features (2010) Journal of Computational Biology, 17(10)

**Examples**

```
require(mclust)
require(nor1mix)
data(sqnData0)
Ynorm=SQN(sqnData0,ctrl.id=1:1000) #after normalization
par(mfrow=c(1,2))
  boxplot(sqnData0,main="before normalization")
  boxplot(sqnData0[1:1000,],add=TRUE,col=3,boxwex=.4)

  boxplot(Ynorm,main="after normalization")
  boxplot(Ynorm[1:1000,],add=TRUE,col=3,boxwex=.4)
  legend(.5,11,legend=c("probes for signal","negative control probes"),text.col=c(1,3),bg="white")
```

---

sqnData0

*example data*

---

**Description**

Simulated data with two samples, each with 1000 negative controls and 5000 signal bearing probes

**Usage**

```
data(sqnData0)
```

*sqnData0*

3

**Format**

A matrix with two columns
