pokemon

Pokémon data

Description

A dataset with pokémon data from Nintendo games.

Usage

pokemon

Format

A data frame with 949 rows and 22 columns:

id a numeric vector representing the ID of each Pokémon
pokemon a character vector representing the name of each Pokémon
species_id a numeric vector representing the species ID of each Pokémon
height a numeric vector representing the height of each Pokémon
weight a numeric vector representing the weight of each Pokémon
base_experience a numeric vector representing the base experience of each Pokémon
type_1 a character vector representing the primary type of each Pokémon
type_2 a character vector representing the secondary type of each Pokémon
hp a numeric vector representing the HP (hit points) of each Pokémon
attack a numeric vector representing the attack points of each Pokémon
defense a numeric vector representing the defense points of each Pokémon
special_attack a numeric vector representing the special attack points of each Pokémon
special_defense a numeric vector representing the special defense points of each Pokémon
speed a numeric vector representing the speed of each Pokémon
color_1 a character vector representing the primary color of each Pokémon
color_2 a character vector representing the secondary color of each Pokémon
color_f a character vector representing the final color of each Pokémon
egg_group_1 a character vector representing the primary egg group of each Pokémon
egg_group_2 a character vector representing the secondary egg group of each Pokémon
url_icon a character vector representing the URL image of each Pokémon
generation_id a numeric vector representing the generation ID of each Pokémon
url_image a character vector representing the URL image of each Pokémon

pokemon_ptbr

Pokémon data (PT-BR)

Description

Uma base de dados de Pokémon, extraída dos jogos da Nintendo.

Usage

pokemon_ptbr

Format

Um data frame com 949 linhas e 22 colunas:

id um vetor numérico representando o ID de cada Pokémon
pokemon um vetor numérico representando a altura de cada Pokémon
id_especie um vetor de caracteres representando o nome de cada Pokémon
altura um vetor numérico representando o peso de cada Pokémon
peso um vetor numérico representando a experiência base de cada Pokémon
exp_base um vetor de caracteres representando o tipo primário de cada Pokémon
tipo_1 um vetor de caracteres representando o tipo secundário de cada Pokémon
tipo_2 um vetor numérico representando os pontos de vida (HP) de cada Pokémon
hp um vetor numérico representando os pontos de ataque de cada Pokémon
ataque um vetor numérico representando os pontos de defesa de cada Pokémon
defesa um vetor numérico representando os pontos de ataque especial de cada Pokémon
ataque_especial um vetor numérico representando os pontos de defesa especial de cada Pokémon
defesa_especial um vetor numérico representando a velocidade de cada Pokémon
velocidade um vetor de caracteres representando a cor primária de cada Pokémon
cor_1 um vetor de caracteres representando a cor secundária de cada Pokémon
cor_2 um vetor de caracteres representando a cor final de cada Pokémon
cor_final um vetor de caracteres representando o grupo de ovos primário de cada Pokémon
grupo_ovo_1 um vetor de caracteres representando o grupo de ovos primário de cada Pokémon
grupo_ovo_2 um vetor de caracteres representando o grupo de ovos secundário de cada Pokémon
url_icone um vetor de caracteres representando a URL da imagem de ícone de cada Pokémon
url_imagem um vetor de caracteres representando o grupo de ovos secundário de cada Pokémon
id_geracao um vetor numérico representando o ID de geração de cada Pokémon
