

# Oracle Database 12cR2 (12.2.0.1) on SUSE Linux Enterprise Server 12 SP3

(how-to install)

**Arun Singh**  
July 2017

## Introduction

This document is not a replacement for official Oracle install document, but to help you understand minor difference you may encounter while installing Oracle Database on SUSE Linux Enterprise Server 12 SP3. This document covers x86\_64 version but installation steps are same for other platforms. We will use latest certified versions of Oracle Database Enterprise version 12cR2 (12.2.0.1).

## Oracle Software

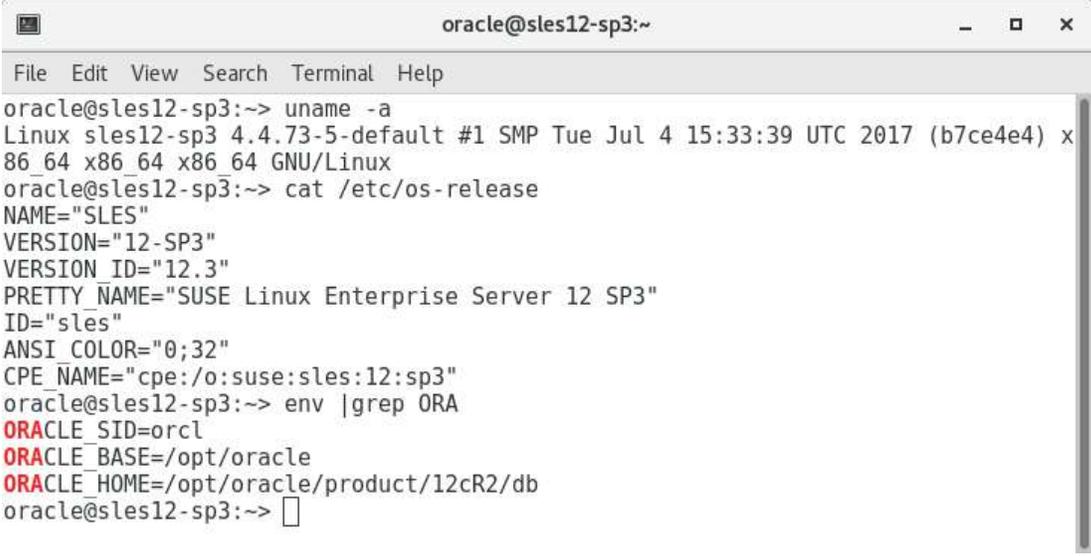

Oracle Database Enterprise Edition 12.2.0.1 is available for public download at:  
<http://www.oracle.com/technetwork/database/enterprise-edition/downloads/oracle12c-linux-12201-3608234.html>

## SUSE Software

SUSE Linux Enterprise Server 12 SP3: <https://www.suse.com/products/server/download/>

## Installation

Install SUSE Linux Enterprise Server 12 SP3 with “**Oracle Server Base**” pattern. You can follow official Oracle Installation manual for selective required rpms.

```
oracle@sles12-sp3:~  
File Edit View Search Terminal Help  
oracle@sles12-sp3:~> uname -a  
Linux sles12-sp3 4.4.73-5-default #1 SMP Tue Jul 4 15:33:39 UTC 2017 (b7ce4e4) x  
86_64 x86_64 x86_64 GNU/Linux  
oracle@sles12-sp3:~> cat /etc/os-release  
NAME="SLES"  
VERSION="12-SP3"  
VERSION_ID="12.3"  
PRETTY_NAME="SUSE Linux Enterprise Server 12 SP3"  
ID="sles"  
ANSI_COLOR="0;32"  
CPE_NAME="cpe:/o:suse:sles:12:sp3"  
oracle@sles12-sp3:~> env |grep ORA  
ORACLE_SID=orcl  
ORACLE_BASE=/opt/oracle  
ORACLE_HOME=/opt/oracle/product/12cR2/db  
oracle@sles12-sp3:~> □
```

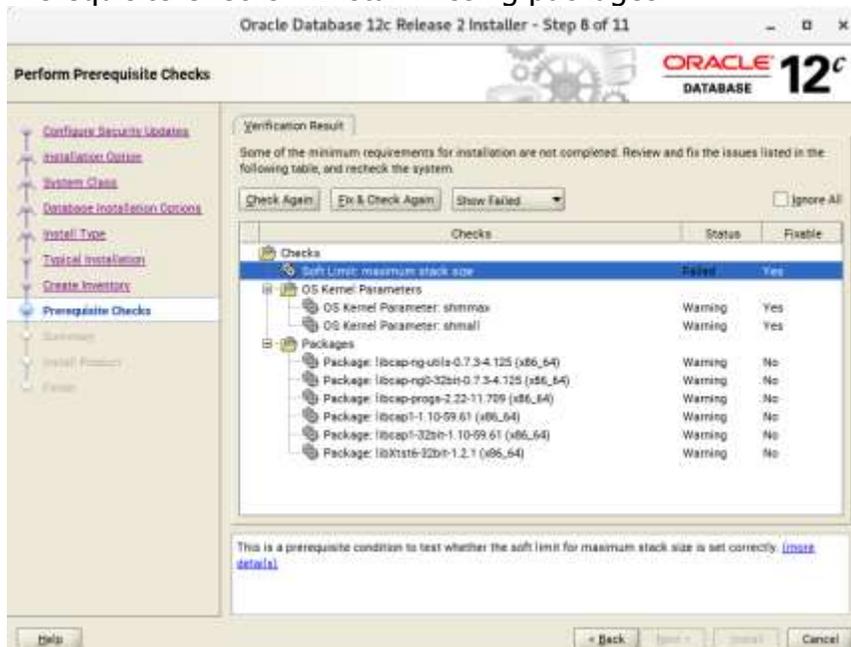

## Installing Oracle Database 12.2.0.1

Installing Oracle Database 12c on SLES12 SP3 is easy, please follow:

1. Download 12.2.0.1 SW (linuxx64\_12201\_database.zip) & unzip locally.
2. Watch for following minor error/warning messages (**Fix before starting Installer**):
  1. Make sure Server is assigned static IP address.
  2. Prerequisite Checks – “Soft Limit: maximum stack size”  
Check & set using “ulimit –s 10240”
  3. Prerequisite Checks – set system limits

```
oracle@sles12-sp3:/opt/oracle
File Edit View Search Terminal Help
sles12-sp3:/opt/oracle # sysctl -p
net.ipv4.ip_forward = 0
net.ipv6.conf.all.forwarding = 0
kernel.shmni = 4096
kernel.shmall = 3270397
kernel.shmmax = 16744435712
kernel.sem = 250 32000 100 128
fs.file-max = 6815744
net.ipv4.ip_local_port_range = 9000 65500
net.core.rmem_default = 262144
net.core.wmem_default = 262144
net.core.rmem_max = 4194304
net.core.wmem_max = 1048576
fs.aio-max-nr = 1048576
sles12-sp3:/opt/oracle #
```

4. Prerequisite Checks – Install missing packages

5. **DBCA Error:** ORA-27104: system-defined limits for shared memory was misconfigured

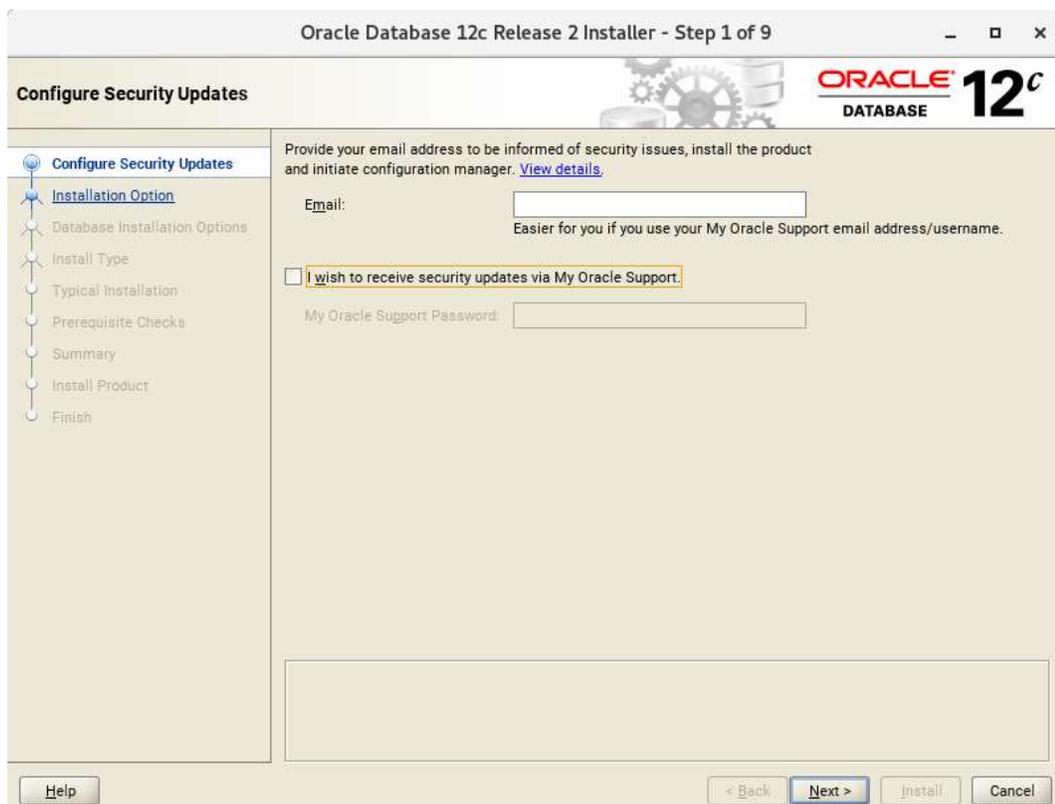

**Fix:** Increase kernel.shmmax & kernel.shmall based on your Server RAM. Please refer Oracle Metalink Note [ID 567506.1] - Maximum SHMMAX values for Linux x86 and x86-64

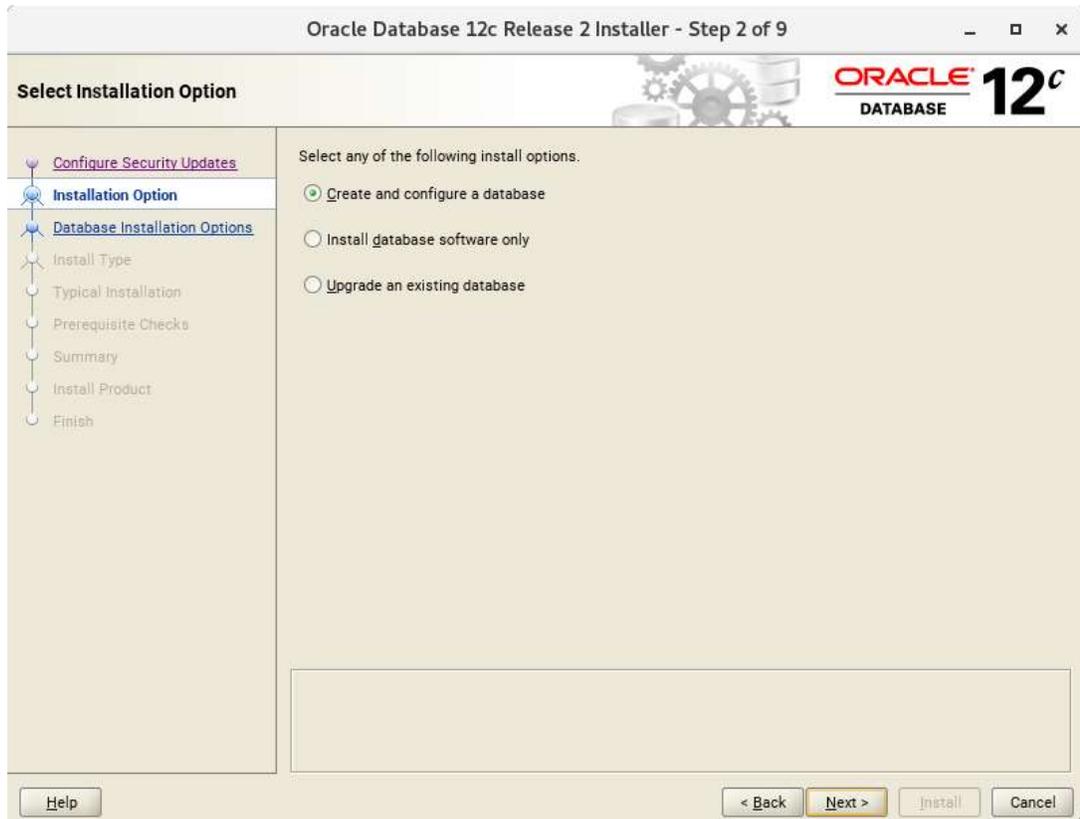

Example for x86\_64 Server with 32GB RAM:

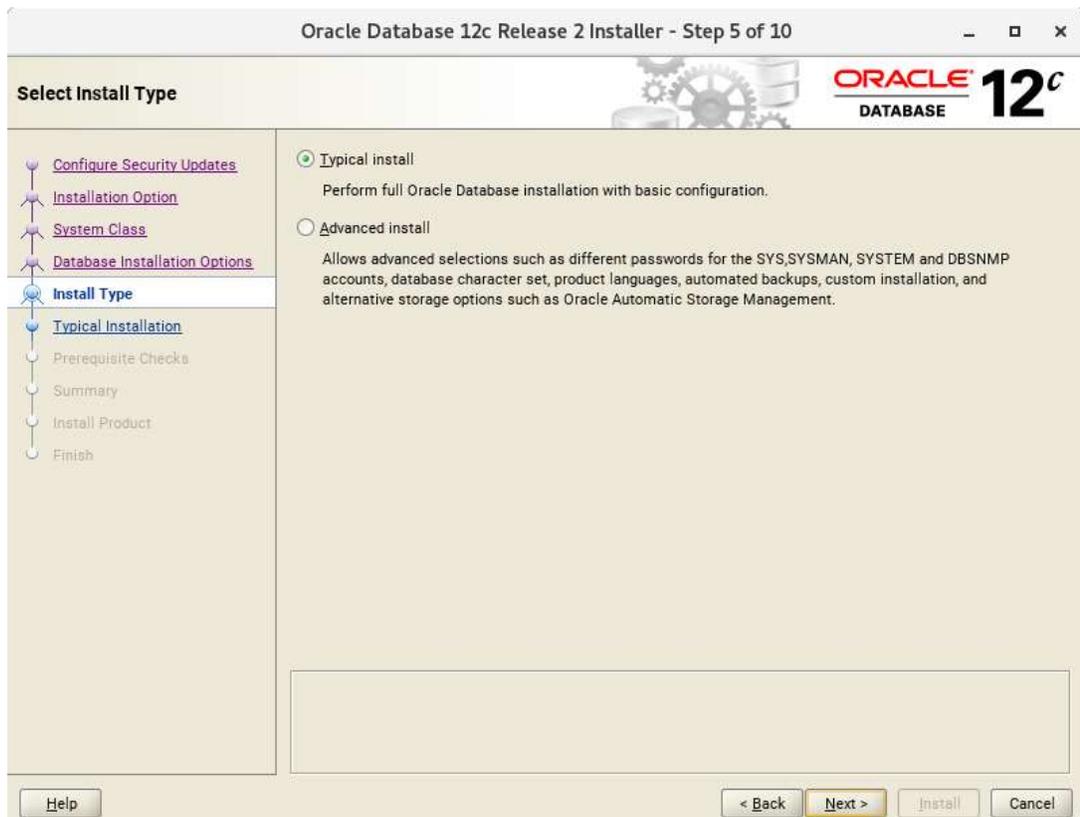

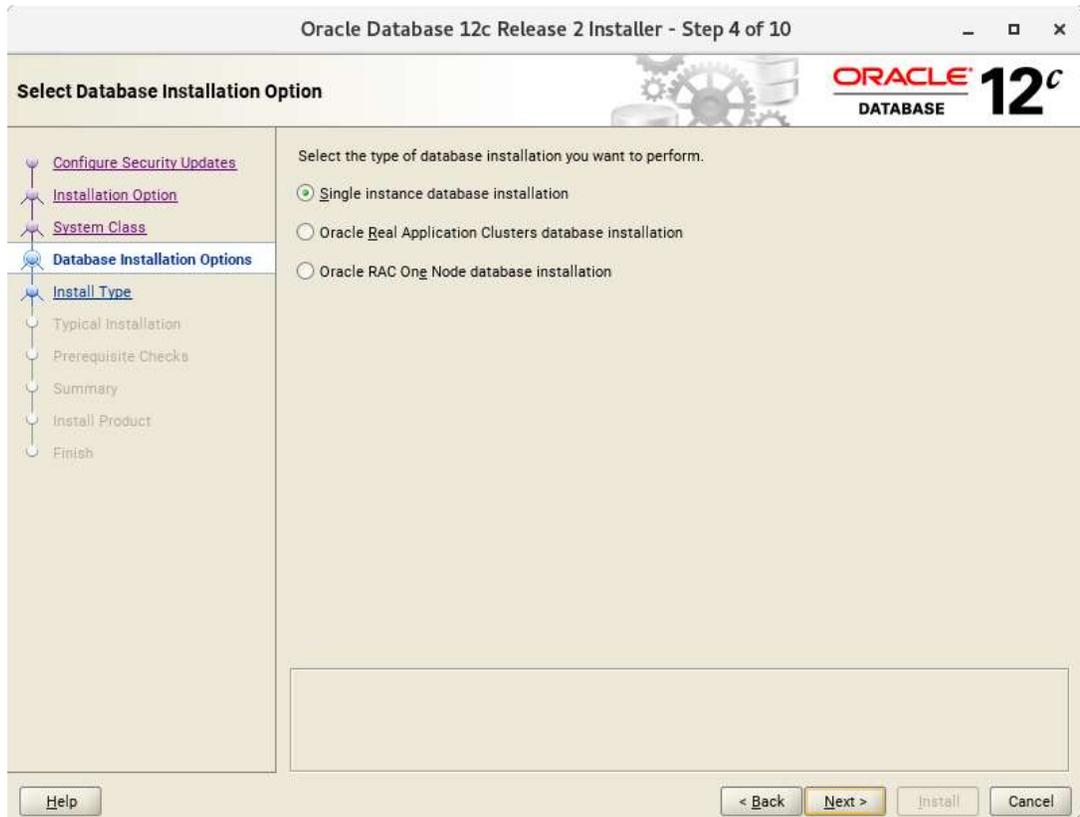

shmmax=34359738368 (=32\*1024\*1024\*1024),

shmall=8388608 (=32\*1024\*1024\*1024 / 4096) - 4096 is page size

3. Start Oracle Universal Installer (OUI): database/runInstaller

Oracle Database 12c Release 2 Installer - Step 6 of 10

**Typical Install Configuration**

Perform full database installation with basic configuration.

Oracle base:

Software location:

Storage type:

Database file location:

Database edition:

OSDBA group:

Global database name:

Password: Confirm password:

Service name:

Create as Container database

Pluggable database name:

Oracle Database 12c Release 2 Installer - Step 7 of 11

**Create Inventory**

You are starting your first installation on this host. Specify a directory for installation metadata files (for example, install log files). This directory is called the "inventory directory". The installer automatically sets up subdirectories for each product to contain inventory data. The subdirectory for each product typically requires 150 kilobytes of disk space.

Inventory directory:

Specify an operating system group whose members have write permission to the inventory directory (orainventory).

orainventory\_group Name:

Oracle Database 12c Release 2 Installer - Step 8 of 11

### Perform Prerequisite Checks

 System Class  
 Database Installation Options  
 Install Type  
 Typical Installation  
 Create Inventory  
**Prerequisite Checks**  
 Summary  
 Install Product  
 Finish

**Verification Result**

Some of the minimum requirements for installation are not completed. Review and fix the issues listed in the following table, and recheck the system.

Check Again   Fix & Check Again   Show Failed    Ignore All

Checks	Status	Fixable
Checks		
Soft Limit: maximum stack size	Failed	Yes
OS Kernel Parameters		
OS Kernel Parameter: shmmax	Warning	Yes
OS Kernel Parameter: shmall	Warning	Yes
Packages		
Package: libcap-ng-utils-0.7.3-4.125 (x86_64)	Warning	No
Package: libcap-ng0-32bit-0.7.3-4.125 (x86_64)	Warning	No
Package: libcap-progs-2.22-11.709 (x86_64)	Warning	No
Package: libcap1-1.10-59.61 (x86_64)	Warning	No
Package: libcap1-32bit-1.10-59.61 (x86_64)	Warning	No
Package: libXtst6-32bit-1.2.1 (x86_64)	Warning	No

This is a prerequisite condition to test whether the soft limit for maximum stack size is set correctly. [\(more details\)](#)
